Here is assignment 3

Google R markdown which is a nice add-on to R useful for making tutorials and presentations in R.

Create an R markdown notebook in R with 3 simple features. A banner up top with your name etc. and what the notebook is going to do.

Create a heading announcing something simple like adding 2+2 then put in the computation.

Create another heading announcing a plot and embed a simple plot into your notebook.

Create another heading announcing a Latex feature and then create a formula using embedded Latex. You can google latex and r markdown if you know nothing about Latex in order to get an idea.

Turn in the notebook and the knitted or compiled HTML markdown notebook for 9 out of 10 points. To get the 10th point create another heading announcing the extra feature and then do something else that uses r markdown but is not covered above. Doesn't have to be complicated or hard, just something a little extra that you find in your research that you didn't use for the first 9 points.

Hi Tony,

Please do send me the homework before you go. Have a god trip!

Best.

Ron

Hi Ron,

Here's a link to the first 3 lectures

<https://www.dropbox.com/sh/sipq9cshgattdyv/AADqDWwsC7eRkBWAmSgQXh-9a?dl=0>

Hopefully you'll get Canvas access in the next day or so and will be able to see the HW. If not I'll get it to you.

Tony

Subject: data minining 1 zip up till now

Hi Tony,

Please do send me a zip of the slides/homework up until now so I can get caught up.

Thanks.
